PROJECT

Human Rights First DocDB, UX Engineer

[GitHub](#)

- Designed layout, wireframes, and user flow per stakeholder specifications in development of secured document search tool for legal team research. Lead the subteam of frontend and UX engineers in implementation through Whimsical, Figma, and Ant Design.
- Constructed mock-up designs and coded the website header, in cooperation with frontend team, using Ant Design, CSS, and HTML JSX/JavaScript XML.

African Marketplace, Front End Developer

[Project Link](#) [GitHub](#)

- Designed frontend layout of the website by using CSS/styled-component.
- Used flexbox to plan UX and layout, with CSS/styled-component to implement, for merchant website including sellers and customers
- Built logout authorization with Axios with authorization (React) and removed JWT to complete logout
- Created user forms with React, React Router, and XML
